**Tourist Police Bureau
Royal Thai Police**

Thailand Tourist Police Application

The **Thailand Tourist Police** application is developed by the Tourist Police Bureau to provide tourists with convenient access to Tourist Police services. Its main features include:

1. Communication between tourists and the Tourist Police
2. Emergency incident reporting
3. Assistance requests and language translation support
4. Information inquiries
5. Access to tourist attraction information and tourism news within Thailand

The **Thailand Tourist Police** application is available for download on **iOS, Android, and Huawei AppGallery** and the app supports chat-based incident reporting and information inquiries in **six languages**:

1. English
2. Chinese
3. Japanese
4. Korean
5. Russian
6. Thai

Tourists can submit reports through the chat function by sending digital files, including their current location and attached photos to help explain the incident.

The application also features an **SOS button** for emergencies or situations requiring immediate assistance. When activated, the app connects directly to the **Tourist Police Emergency Call Center (1155)** and the Tourist Police Bureau's Command and Control Operation Center.

To improve the efficiency of Tourist Police operations, incident reports submitted through the application are automatically forwarded to the Tourist Police Station responsible for the relevant area. All Tourist Police officers on duty in that jurisdiction receive the information simultaneously, enabling them to respond more quickly and provide timely assistance or take immediate action when needed.

Example of signing up with phone number screen

The screenshot shows a mobile application interface for creating an account. At the top, there is a blue header with the text 'สมัครสมาชิก' (Register). Below the header, the title 'สร้างบัญชี' (Create Account) is displayed, followed by the text 'คุณมีบัญชีอยู่แล้วหรือไม่? Login' (Do you already have an account? Login). A circular placeholder for a profile picture is shown with a blue checkmark icon. Below this, there are four input fields with red asterisks indicating required fields: 'ชื่อ *' (Name), 'สัญชาติ *' (Nationality), 'ประเทศ *' (Country), and 'เพศ *' (Gender). Each field has a dropdown menu with a blue arrow icon. At the bottom of the form, there is a blue button with the text 'ตกลง' (Agree).

5. Enter personal information:

- a) First Name - Last Name
- b) Nationality
- c) Country
- d) Gender
- e) Tap the **Agree** button.

Example of the Personal Information Entry Screen

User Profile Settings

Once registration is completed successfully, users can access the application and configure the following settings:

Example of the User Profile Settings screen in the application.

Profile Settings

Example of the User Profile settings screen > Profile Settings

1. The Profile Settings menu provides the following settings:
 - a) **Edit Profile** – Allows users to update their personal information.
 - b) **Emergency Contact** – Allows users to update emergency contact details.
 - c) **Social Media Account** – Allows users to link their social media accounts with the application.
2. To upload a new profile picture, tap the profile picture icon.

The system will request permission to access the user's photo library.

Notification Settings

Example of the User Profile Settings screen > Notification Settings

1. The Notification Settings menu provides the following settings:

- a) Push Notifications
- b) Chat Notifications

Security and Privacy Settings

Example of the User Profile Settings screen > Security and Privacy Settings

1. The Security and Privacy Settings menu provides the following settings:

- a) Allow location access
- b) Allow camera access
- c) Allow photo library access
- d) Allow microphone access
- e) Change Password

Language Settings

Example of the User Profile Settings screen > Language Settings

1. Language menu: Allows users to select the preferred language for displaying content within the application.

Contact Us

Example of the User Profile Settings screen > Contact Us

1. Contact Us menu: Provides the application's contact information, including:
 - a) Website
 - b) Facebook

Log Out

Example of the User Profile Settings screen > Log Out

1. Log out menu: Users can sign out of the application by tapping 'Logout' and selecting 'Yes, log out' to confirm.

Incident Reporting

When users encounter an incident and need to report it to the authorities, they can do so through two available channels: **via Chatbot** and **via In-App Call**, with the details as follows

1. Report via Chatbot

Users can report an incident via the **Chatbot** from two entry

Example of Reporting Incident via Chatbot screen (1)

- 1) Tap the “Start Reporting” button

Example of Reporting Incident via Chatbot screen (2)

2) Tap “Click to Select” button > Select the desired question set

Example of Reporting Incident via Chatbot screen (3)

3) The user provides additional details about the reported issue.

Example of Reporting Incident via Chatbot screen (4)

4) Tap "Click to Select" button > Select the province where the incident occurred.

Example of Reporting Incident via Chatbot screen (5)

5) Tap the “Share Location” button > Select the location where the incident occurred

Example of Reporting Incident via Chatbot screen (6)

6) Tap "Click to Select" button > Select an image to attach to the incident report.

7) The incident report is submitted successfully, and a report number is displayed.

2. Report via In-App Call

Users can report an incident via In-App Call in two formats:
the **SOS button** and the **1155 button**.

Example of Reporting Incident via In-App Call (1)

1) Tap the **“SOS button”** to make an immediate call to the authorities via an internet connection.

Example of Reporting Incident via In-App Call (2)

2) Tap the “1155 button” to make an immediate call to the authorities via an internet connection

Track Incident Status and View Incident History

Users can view their incident report history and track the progress of their incident reports.

The status categories are divided as follows:

Example of Incident Report History screen

No./Description

1 **Pending Status** : The Incident reports that are waiting for the authorities to take action.

2 **In Progress status** : The Incident reports that are currently being handled by the authorities.

3 **Closed Status** : The incident reports that have been successfully resolved and closed.

4 **Report Details** : The comprehensive details of the incident submitted by the user.

Viewing Places of Interest and In-App News

In addition to serving as an incident reporting and emergency assistance platform with the Tourist Police, the application also provides users with official updates and news from the Tourist Police, as well as interesting tourist destination information for users

Example of Places of Interest Menu screen (1)

Example of Places of Interest Menu screen (2)

No./Description

1 “See More” button : Tap to view information about interesting places and recommended nearby tourist attractions.

2 Search Feature : Users can search for specific attraction names.

3 Attraction Tab : Displays a list of available tourist attractions located near the user.

4 Activity Tab : Displays a list of available activities or events happening near the user.

5 Tourist Attraction List Display : Shows the comprehensive list and catalog of tourist attractions.

6 Tourist Attraction Details : Displays in-depth information and descriptions for each specific attraction.

Example of Places of In-App News Menu screen

No./Description

1 "See More" Button : Tap to view all news and official updates from the Tourist Police.

2 News List Display : Shows the comprehensive list and feed of Tourist Police news updates.

3 News Details : Displays in-depth information, articles, and full descriptions for each specific news item.

Incident Alerts and Announcements

Incident Alerts

In addition to serving as an incident reporting and emergency assistance platform with the Tourist Police, the system can also send emergency alerts directly as in-app notifications. These broadcast messages are designed to instantly warn tourists and citizens located within a specified radius of an emergency situation.

Example of Incident Alert Feature screen

Announcement

The application also features an announcement system to broadcast essential information and alerts to tourists and citizens. This includes updates regarding local prohibitions, rules, regulations, and verified anti-fake news updates to ensure public awareness.
